

### **Independent Beta-Glucan Testing**

We guarantee the following specs on the Perfect Mushroom Immunity (90 Capsules):

Beta-Glucans > 15% (225mg/serving)

Alpha-Glucans < 5% (75mg/serving)

To ensure the quality of the Perfect Mushroom Immunity, we do additional spot checks from time to time to independently lab test the actual Beta-Glucan and Alpha-Glucan levels in our Perfect Mushroom Immunity.

Attached is independent lab testing we had done on the Perfect Mushroom Immunity Powder. We then used this same material to make the Perfect Mushroom Immunity Capsules.

As the Perfect Mushroom Immunity Capsules is 1.5 grams/serving (as opposed to 2.4 grams/serving for the powder) - the lab tested Beta-Glucan and Alpha-Glucan levels test out as follows:

	<b>Specs</b>	<b>Tested</b>
<b>Alpha Glucans</b>	< 5%	2.37%
<b>Beta Glucans</b>	>15%	28.36%
<b>Beta Glucans/serving</b>		425mg
